# Cleanroom

## Cleanroom Tape

### *Low-particulate, low-leachable cleanroom tape*

Our cleanroom tape is made from a non-vinyl polyolefin film and features a water-based acrylic pressure-sensitive adhesive. The cleanroom adhesive tape is wound on a particulate-free plastic core.

It is then cleaned and packaged in our in-house Class 10 (ISO Class 4) cleanroom.

Depending upon the surface energy level, our tape is permanent or removable. Our cleanroom tape offers good chemical resistance and provides an excellent moisture barrier. For sealing and construction applications it performs well in a wide range of temperatures and maintains superior adhesive bonding characteristics for a prolonged period of time.
