Tyvek® Sheets

Description

Single- or double-layer Tyvek® sheets are available in custom sizes to meet various application needs. The Tyvek® rolls are double cleaned prior to production to obtain ultrapure cleanliness levels.

Product Design

- Standard sizes available
- Other custom sizes available upon request for larger quantities

Application

Tyvek® sheets are used primarily as a clean protective layer between end products and their packaging.

Specifications

- The sheets are produced in a Cleanroom ISO Class 5 environment and ultraclean to level 200 (according to IEST-STD-CC1246D)
- FDA approved material
- Allows for steam, EtO and gamma sterilization processes

Benefit

Prevents particles from getting inside the end-use product
