Visible Clean Polyethylene (PE)

Description

Polyethylene is the most commonly used flexible packaging film in the industry. It can be used in a large variety of applications. The visible clean film is ideal for the packaging of standard parts.

Our visible clean polyethylene packaging products are manufactured in a controlled environment in our own facility.

Product Design

- Standard thickness: 100 microns
- Mono and multilayer LDPE, LLDPE and HDPE
- Available in various shapes: tubing, centerfold, sheets, bags and other specialties upon request
- Special grades and blends available

Application

- Polyethylene is ideal for packaging clean standard parts requiring a level of packaging cleanliness compatible with their production's cleanliness.

Visible Clean Polyethylene (PE)

Specifications

- Noncorrosive
- Strong puncture resistance
- Flexibility combined with strength
- Low water vapor transmission rate
- Resistant to most chemicals

Benefits

- Coextruded and pinhole-free polyethylene
- Suitable for gamma irradiation
- Double packaging
- Easily heat-sealed for bag manufacture
- 100% recyclable
- Pyrogene-free
